

# CUTTER CATCH TRAY INSTALLATION INSTRUCTIONS

\*BBF-104814

1. Remove packing material from around catch tray
2. Align catch tray mounting arms with the cutter pivot pins located at exit of cutter.
3. Hook the tray arms onto the cutter pivot shoulder screw body.
4. Gently lower until the tray rests against the back panel

Note: If running continuous forms (i.e. no cutting) remove catch tray.

The catch tray can only hold approx. 20-30 cut forms. Excessive stacking could possibly cause the cutter to back up and jam.
